

# AP 301 P™

## Spray-Dried Porcine Blood Cells (Haemoglobin)

### WHAT IS IT?

AP 301 P is a spray-dried hemoglobin powder, derived from the red cell fraction of healthy pigs, bound for human consumption. AP 301 P is a source of highly digestible amino acids. This spray-dried product is a dark red, odorless powder.

AP 301 P contains 92% protein (min. guaranteed value).

### APPLICATION IN THE EU

For its use as a high availability protein source in animal feeding for non-ruminant species, like swine, poultry, and aquaculture, facilitating the needed formula density, as well as a performing animal response.

### BENEFITS

- Highly digestible and palatable
- Improves intestinal health
- Favors the digestion process
- Favors the growth of the animal
- Increases productivity
- Gives financial profit to farmers

### KEY POINTS

- A 100% natural source of highly digestible amino acids
- Its available hemic iron content adds to its intrinsic protein value
- Enhances feed intake
- Low carbon footprint
