

AP 820 P™

Spray-Dried Porcine Plasma

WHAT IS IT?

AP 820 P is a spray-dried blood plasma, naturally obtained from healthy pigs, bound for human consumption. AP 820 P is a source of functional and bioactive proteins, containing the Albumin, Globulins and Immunoglobulin fractions, among others. This spray-dried plasma is a light beige odourless powder.

AP 820 P contains 75% protein (typical value).

APPLICATION IN THE EU

For its use as a highly available and functional protein source in animal feeding for non-ruminant species like swine, poultry and aquaculture, enabling a better animal response.

BENEFITS

- Improves intestinal health
- Supports the immunological system
- Favors the digestion process
- Helps to reduce preventive medication costs
- Increases productivity
- Gives financial profit to farmers

KEY POINTS

- A 100% natural source of functional and bioactive proteins
- Favors the growth of the animals
- Enhances feed intake
- Enhances welfare
- Low carbon footprint
