

## FEEDING INSTRUCTIONS

- BetaWean was designed as a follow-up feed to Alpha-Milk (creep feed).
- Feed BetaWean immediately after finishing with Alpha-Milk.
- There is no need to mix the two feeds for the changeover.
- Allow 4-6 kg BetaWean per piglet until they reach 12-14 kg body weight.
- If used as a creep-feed, feed from the 7th day after birth, first on sleeping mats.
- Do not overload feeders to ensure feed remains fresh.
- Check the feed flow frequently to ensure feed is not stuck or wasted.

## BETAWEAN GRUEL

- BetaWean can be used as a gruel.
- Mix 1 part meal and 3 parts water or liquid milk.
- Feed BetaWean gruel to very small, orphan, and (or) sick pigs.
- Feed BetaWean gruel to pigs that refuse to eat dry meal after weaning.
- Gradually thicken the gruel to accustom pigs to dry meal.
- Always offer dry BetaWean (in separate containers) along with gruel.

## OTHER CONSIDERATIONS

- Always offer fresh water for ad libitum consumption when feeding BetaWean.
- Removed uneaten feed and throw it away or give it to the sow (if clean)
- Keep the bags outside the farrowing-nursery rooms in a dry-cool-dark place.

## MADE IN GERMANY

BetaWean is made in Germany under our direct supervision and using proprietary and exclusive formulas. The factory has been recently renovated to take advantage of the latest technology in equipment and quality control processes that ensure the highest possible level of quality in each bag of feed. As the factory makes only products for piglets, the ingredients used are of the best possible quality!

## TESTED FOR PERFORMANCE

BetaWean has over 10 years of existence in the European market, where it has been tested under various commercial conditions. Its unique formulation and texture continues to provide exceptional results as it is continuously supervised by experienced personnel.

## DUAL FORM

BetaWean is provided in a meal form with well-dispersed whole flakes of oats. A meal offers extra benefits over pellets for pigs of young age, because it has been shown to reduce the incidence and prevalence of diarrhea due to reduced liquidity in the gastrointestinal tract. Oat flakes enhance taste, texture, and appeal of the feed, increasing piglet curiosity. BetaWean is also available as a pellet for those farms that can benefit from it.

## GUT HEALTH

Contains ingredients that regulate gut microflora, including zinc oxide and copper sulfate at regulated levels, functional fibers, immunoglobulins, medium-chain triglycerides, and two powerful organic acids.

## NON-MEDICATED

BetaWean does not contain any medications. A water-based medication program is recommended, always under the supervision of a qualified veterinarian.

## INGREDIENTS

### MILK AND SUGARS

Intermediate levels of lactose from high quality dairy products and simple sugars ensure pigs eat enough feed to grow while avoiding digestive upsets.

### EXTRUDED FULL-FAT SOYBEANS

With very low levels of anti-nutritional factors, full of highly digestible oil, and highly digestible protein, extruded soybeans are a choice source of protein for piglets. They are also very tasty when cooked properly!

### POTENTIATED ZINC OXIDE

Our products contain specific sources of Zn and Cu with functional properties, used within EU limits.

### APPLE POMACE

Along with sugar beet pulp and oat fibers, apple pomace fibers offers a well-balanced source of functional fibers to regulate gut microflora activity.

### FLAKES OF STEAM-ROLLED OATS

Whole oat-flakes enhance product flowability, trigger the curiosity of pigs, and provide a good source of fiber to control digestive upsets.

### IMMUNOGLOBULINS

Derived from eggs, these antibodies are designed to act against specific piglet diseases. This is a unique product developed in Japan, offering the same benefits as animal plasma, in addition to enhanced gut health.

### CITRIC AND BENZOIC ACIDS

Pigs love citric acid, and this is also the acid of choice for BetaWean; to enhance feed intake and protect from opportunistic pathogenic gut bacteria. Benzoic acid has also very strong antibacterial activity.

### COCONUT FAT

Coconut fat has the highest digestibility among all oils and fats. It is the best source of energy for young pigs.

## KEY NUTRIENTS

Net Energy:	10 MJ/kg	Fiber:	3.5%	Dig.	
Protein:	18.0%	Dig. Lysine:	1.1%	Phosphorus:	0.35%
Lipids:	4.5%	Calcium:	0.75%	Sodium:	0.30%

## COMPLETE IN ALL

BetaWean is a complete feed. It contains all required nutrients for suckling and weaned pigs. In addition to balanced levels of energy and protein, it contains the full complement of vitamins, minerals, and amino acids.
