nucalm®

Any disharmony between the animal and its environment can lead to abnormal behavior which may be sporadic, unpredictable and has significant economic and animal welfare implications.

nucalm® is an innovative product specifically formulated to enhance the pig's ability to cope with the stresses of modern pig production systems, reduce aggressiveness and tackle behavioral problems (Tail biting, Flank biting & Ear Necrosis). It has a behavioural, calming effect, while simultaneously helping the respiratory system by improving oxygen transportation to tissues and enhancing the pigs' natural anti-bacterial and immune systems responses.

nucalm® contains a combination of highly efficient natural and synthetic bio-active ingredients with proven antioxidant action and beneficial effect on immunity response.

Key benefits of nucalm®:

- Promotes improved animal well-being, resulting in content and calm pigs which will thrive better.
- Improves blood circulation and tissue oxygenation throughout the production cycle, promotes oxygen transportation to the tissues, directly benefitting the pig's respiratory system and preventing hypoxia.
- Reduces the incidence of stress related behavioural problems including Tail & Flank biting and Ear Necrosis.
- Reduces the risk of gastric ulcers and inflammation at all stages of production.
- Reduces the amounts of endotoxins produced.
- Enhances the pigs natural anti-bacterial and immune system responses, thus reducing reliance on antibiotics.
- Promotes optimum performance and growth at all stages of production.
- Stimulates natural and sustainable support for optimum gut health and animal welfare.

Inclusion Recommendation: 3-5kg / ton of feed

Packaging: Available in 25kg bags
