## dry 2 milk

Proactive transition nutrition pays off

### Premium supplement for healthier animals and stronger lactation

**dry 2 milk** is a premium nutritional supplement designed to overcome the challenges (negative energy balance, metabolic disorders, rumen atony, metritis/mastitis) during the most demanding phase in a ruminant's life.

#### Designed for use during

- Far-off dry
- Close-up
- Fresh animals

#### Key Benefits

- To support the immune system and reduce the oxidation of fats
- To stimulate microflora development, to help in ketosis reduction
- To prevent the incidence of subclinical or clinical ketosis, to increase milk production
- To maintain blood cations levels, to optimize pH and favor HCO<sub>3</sub> formation in the rumen through saliva recycling
- To assist and enhance DM intake and cellulose digestibility
- To decrease inflammatory pressure, boost antibacterial response & improve milk production

#### Powerful ingredients included:

- Polyphenols
- Protected choline
- Protected vitamins (niacin)
- Technologically advanced buffer
- Live yeast

#### Dosage:

**Dairy cows:** 250-500g per animal per day (mixed in the TMR)

**Ewes / Goats:** 30-50g per animal per day

**Packaging:** Available in 20 kg bags and 500 kg big bags
