maxi milk

Achieve more milk easier

Premium supplement to maximize milk output in ruminants

maxi milk is a premium nutritional supplement designed to increase milk production, enhance milk quality, and support udder health in small and big ruminants. Developed by nutritionists, it is ideal for both commercial operations and small-holder farms.

Designed for use during

- Early lactation (first 90 days post calving/lamping)
- Mid-lactation
- Low producing animals

Key Benefits

- To maintain rumen pH at optimal levels, to enhance Ca absorption
- To reduce metabolic disorders, to increase DM intake and milk production
- To optimize bacteria population & microbial protein production
- To assure the amino acid balance at small intestine level and improve milk production
- To improve rumination and control sub-clinical ketosis
- To decrease inflammatory pressure, boost antibacterial response & improve milk production

Powerful ingredients included:

- Polyphenols
- Protected amino acids (Lysine & Methionine)
- Protected choline
- Technologically advanced buffer
- Live yeast

Dosage:

Dairy cows: 250-500g per animal per day (mixed in the TMR)

Ewes / Goats: 30-50g per animal per day

Packaging: Available in 20 kg bags and 500 kg big bags
