empowering evolution

nusafe

nusafe is a nutritional solution that aims to improve livestock wellness, nutritional efficiency and sustainable production.

nusafe is a combination of a microporous, crystalline aluminosilicate clay and a mixture of natural bioactive ingredients, such as Thymol, Olive Oil Polyphenols, Anethole, Curcumin, Apigenin and Hesperidin. These bioactive ingredients exert their beneficial physiological functions by enhancing the animals' adaptive cyto-protection and anti-inflammatory capacity.

The combination of highly effective natural bioactive ingredients has proven antioxidant action and beneficial effect on immunity response.

The animals are more resilient to stressors like diseases, mycotoxins and environmental challenges.

nusafe improves overall health and production efficiency.

The animals fed diets with **nusafe** have better FCR, higher growth rate and reduced needs for antibiotic treatments.

Inclusion Recommendation: 1-2 kg / ton of feed

Packaging: Available in 25 kg bags
